

Arbiter

Arbiter

GenericVcArbiter

```
graph BT; G[GenericVcArbiter] --> A1[Arbiter]; G --> A2[Arbiter];
```

The diagram illustrates a hierarchical or distributional structure. At the bottom, a box labeled 'GenericVcArbiter' is connected by two separate lines to two boxes labeled 'Arbiter' positioned above it. The lines from 'GenericVcArbiter' branch out to the left and right, each ending in an arrowhead pointing towards the corresponding 'Arbiter' box.
